## How We Review

Every AI tool undergoes a rigorous 5-step evaluation process. No shortcuts. No exceptions.

1

### Independent Testing

Minimum 2 weeks of active use across realistic scenarios. We pay for every tool we test.

2

### Documentation Review

Privacy policies, terms of service, and security certifications analyzed line by line.

3

### Developer Interview

Direct conversations with the team about architecture, data handling, and roadmap.

4

### Expert Cross-Check

Independent researchers validate findings before publication.

5

### Public Score

Transparent scoring with full rationale for every category. Companies can respond.

## 10-Category Scoring Framework

Every tool scored 0–100 across weighted categories that matter to buyers.

**25%** Core AI Performance

**20%** Data Privacy & Security

**15%** Transparency & Explainability

**10%** Reliability & Uptime

**10%** Compliance & Regulatory Fit

**8%** Pricing Fairness

**5%** Integration & Usability

**4%** Human Override Capability

**2%** Vendor Accountability

**1%** Bias & Fairness
